

Imagine a world without fish

A SEA CHANGE

Ocean Acidification Documentary

FREE ADMISSION

open to the public

7:00 pm

Thursday, Nov 12, 2009

Auditorium of **Anchorage Museum at Rasmuson Center**
625 C Street, Anchorage

A Sea Change is the first **DOCUMENTARY ABOUT OCEAN ACIDIFICATION**, the underbelly of climate change. Join us Thursday evening for the film showing. Ocean acidification is about excess carbon dioxide dissolving in our oceans, changing sea water chemistry. The more acidic water makes it difficult for tiny creatures at the bottom of the food web to form their shells. The effects could work their way up to the fish 1 billion people depend upon for their source of protein.
